AspenTech Wins 2011 Supply & Demand Chain Executive 100 Award for Integrated Supply and Demand Planning Project

aspentech Software Helps Leading Plastics and Chemicals Manufacturer Increase Length of Scheduling Horizon by 100 percent and Reduce Maintenance over 80 Percent

BURLINGTON, Mass. – July 27, 2011 – Aspen Technology, Inc. (NASDAQ: AZPN) a leading provider of software and services to the process industries, today announced it has won a [2011 Supply & Demand Chain Executive 100 Award](#) for an integrated supply and demand planning project. Using aspenONE Supply Chain software, a leading plastics and chemicals manufacturer increased the length of its scheduling horizon by 100 percent and reduced maintenance over 80 percent.

- By consolidating 25 unique models into a single set of [aspentech Supply Chain](#) applications the customer integrated collaborative demand management, inventory planning, supply planning, plant scheduling and distribution scheduling.
- The customer improved agility by standardizing and integrating business processes, making them consistent with the [Supply Chain Operations Reference \(SCOR\) model](#), a best practice framework developed by the Supply Chain Council. Standardization also enabled greater data collaboration between all models, regions, and businesses, reducing IT ownership costs.
- The award from *Supply & Demand Chain Executive Magazine* recognizes 100 Great Supply Chain Projects. Judges focused the selection criteria on supply chain transformation projects that have had a significant impact on manufacturers.
