Notes <p>* In general, AspenTech aspenONE® software license agreements with customers permit use of the licensed software on Supported Computers at customer Sites. "Supported Computers" include computers with a manufacture, model and operating system for which AspenTech offers a supported version of the software, and that are controlled by the customer. "Sites" are customer facilities or locations specified in the license agreement.</p> <p>AspenTech permits customer use of licensed aspenONE software in the cloud where: (i) the Platform Support specifications published by AspenTech for the relevant version of the software product include cloud support; (ii) only the customer has access to the licensed software hosted by the cloud service provider; and (iii) the user is accessing the software only from a Site specified in the applicable license agreement.</p> <p>Cloud deployment does not change any license restrictions, including the restrictions on which regions can access the software.</p> <p>When running software on a virtual machine, the machine should meet the same requirements.</p>

<p>V11.1 Platform Specifications that are supported</p>	Exchange ¹⁸	Aspen Infrastructure - Product Installation	Software License Manager (SLM) ¹⁹	aspenONE Update Center Windows	aspenONE Integration Foundation	Aspen Reporting Framework 64-bit	Aspen Framework Server (AFW)
<p>AspenTech does not support the in-place upgrade of the Operating System (for example: upgrade Windows 7 to Windows 10) with AspenTech software already installed. Our recommendation is to uninstall Aspen Software before upgrading the OS and reinstall it after the upgrade.</p>							
<p>Your Aspen SLM Server must be installed and running prior to installing any V11 product.</p>							
<p>If running standalone, 1280 x 800 is the minimum recommended resolution monitor for servers.</p>							
<p>For SLM server using the Type 1 Desktop configuration, the minimum memory is 4GB with 20GB hard drive.</p>							
<p>Microsoft Active Directory/Domain Services (Required for aspenONE Web Server)</p>							
<p>¹⁸ ¹ If using aspenONE Exchange on Windows Server 2012 R2, you must select the Desktop Experience option during Windows installation to enable Flash training videos.</p>							
<p>¹⁹ SLM supported in cloud (Azure VM/Amazon VM) for ENG products that are supported in the cloud</p>							
<p>²⁰ If FIPS is enabled, aspenONE Exchange users must have the latest Windows Update patches installed on their machine.</p>							
<p>²¹ Office 365 - 32-bit support only</p>
