Partner List

Aspen Operator Training
AspenTech Implementation Services Provider (ISP) Network
Please refer to this list of our partners for the implementation of your next operator training simulation (OTS) project using Aspen Operator Training. Each of these organizations has a trusted track record of successful OTS implementations and can provide the expertise to get your OTS off the ground.

**Equinox Software & Services Pvt. Ltd.**  
Serving customers in Asia-Pacific, Europe and Middle East  
[www.equinoxweb.co.in](http://www.equinoxweb.co.in)

Equinox Software & Services Pvt. Ltd. (EQNX) is a leading provider of IT-enabled process optimization solution and services for the global process industry, using a wide variety of commercial and in-house software applications. Their services incorporate software application knowledge and domain expertise of engineering and manufacturing processes. Equinox has successfully delivered engineering consulting solutions and services, as well as MES and SCM projects across Asia-Pacific, the Middle East, Australia and New Zealand.

**Genesis Oil & Gas**  
Serving customers in all global regions  
[www.genesisoilandgas.com](http://www.genesisoilandgas.com)

Genesis helps energy companies worldwide create, realize and enhance the value in their assets. They provide a suite of asset life cycle and specialist technical services, which are supported by proprietary tools and processes and unique expertise. Genesis incorporates the use of AspenTech products into a wide variety of projects and specialist technical services provisions to deliver advanced, integrated, holistic solutions.
Ingenero
Serving customers in Europe, the Middle East, Africa, Latin America and North America
www.ingenero.com

Ingenero is a high-end process consulting and process engineering firm specializing in unique, value-added, operational support solutions to improve profitability, reliability, safety and compliance of process operations. Ingenero is headquartered in Houston, Texas, USA, with a strong engineering technology center in Mumbai, India. Ingenero’s list of satisfied process industry customers spans the U.S., the Middle East, Europe, Africa and Southeast Asia.

Inprocess
Serving customers in Europe, Middle East, Africa, Latin America and North America
www.inprocessgroup.com

Inprocess is the process simulation knowledge provider for the process industries. Inprocess’ mission is to enable its clients to maximize the benefits they can obtain from their investment in process simulators. This is achieved by supplying professional services in the form of technology transfer, process simulation projects (either dynamic or steady state), by implementing operator training systems and by licensing proprietary software tools.
Sulphur Experts
Serving customers in all global regions
www.sulphurexperts.com

Sulphur Experts is a globally recognized process engineering company providing specialized testing, analytical and engineering support services to the amine treating, gas dehydration/refrigeration and sulphur recovery industry. Sulphur Experts traces its roots to its predecessor company, Western Research, and is credited with inventing and implementing key analytical and engineering methods and tools used to test, evaluate and optimize sulphur recovery and associated processes like amine treating and sour water strippers.

Xodus Group
Serving customers in all global regions
www.xodusgroup.com

Xodus Group offers engineering and advisory support for oil and gas upstream operators worldwide as they seek to overcome the challenges they face throughout the life of their assets. Their team of engineers delivers practical, upfront solutions that directly address process and operational challenges. Xodus Group is recognized as a world leader in the best use of big data and simulation based solutions, including dynamic process simulation, online monitoring and optimization (digital oilfield) and integrated modelling systems.

For the most up-to-date directory of ISPs, please visit our partners webpage.
AspenTech is a leading software supplier for optimizing asset performance. Our products thrive in complex, industrial environments where it is critical to optimize the asset design, operation and maintenance lifecycle. AspenTech uniquely combines decades of process modeling expertise with big data machine learning. Our purpose-built software platform automates knowledge work and builds sustainable competitive advantage by delivering high returns over the entire asset lifecycle. As a result, companies in capital-intensive industries can maximize uptime and push the limits of performance, running their assets faster, safer, longer and greener.
